Art Unit: 2873

Allowed claims: 1-5, 7-9, 11-13, and 15-31

Reasons for Allowance

The following is an examiner's statement of reasons for allowance: none of the prior art either alone or in combination disclose or teach of the claimed combination of limitations to warrant a rejection under 35 USC 102 or 103.

Specifically in reference to independent claim 5, none of the prior art either alone or in combination disclose or teach of eyewear as disclosed above, specifically wherein the first lens has a 15% green color saturation and the second lens has a 30% yellow color saturation.

Specifically in reference to independent claims 9 and 21-22, none of the prior art either alone or in combination disclose or teach of eyewear as disclosed above, specifically wherein the color saturation level of the green tinted lens filter is less than the color saturation of the yellow filter.

Specifically in reference to independent claims 7, 26, and 31, none of the prior art either alone or in combination disclose or teach of eyewear as disclosed specifically wherein the green tinted lens has a peak filter bandwidth of 500 nm and the yellow tinted lens has a peak filter bandwidth of 555nm.

Response to Arguments

Applicant's arguments see Remarks, filed February 20, 2004, with respect to claims 1-4 and 11-21 have been fully considered and are persuasive. The Examiner's basis for allowability for independent claims 1 and 12 is the same as those set forth within that Response. The rejection of claims 1-4 and 11-21 has been withdrawn.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Marason et al is cited as having some similar structure to the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
